

Functional Evaluation of Patient with Bipolar Disorder

Luis Gutierrez Rojas: Avenida de Madrid nº 1 Piso 4º, 18012 Granada. E-mail: luisgutierrezrojas@eresmas.com
Tel: 958-200017

Objectives: 1. - To describe several variables of Bipolar Disorder patients. These are the next ones: sociodemographics variables, evolution of the illness, current clinical situation, grade of treatment adherence, toxic abuse, discapacity grade and social support. 2. - To determine which of these variables of the illness are associated with a worse patient's quality of life. 3. - To compare the quality of life in the patients with Bipolar Disorder with a control group of healthy subjects.
